Profile Summary

I'm a final-year B.Tech CSE student who genuinely enjoys building things with code - whether it's a clean, responsive website or an AI-powered tool that solves a real problem. Over the past year, I've explored different areas of tech through projects I really enjoyed working on - like a crypto prediction app using Streamlit, an image generator built with Stable Diffusion and ComfyUI, and a personalized health tracking website using just HTML, CSS, and JavaScript. I'm always excited to learn new skills, take on new challenges, and create something useful. For me, it's not just about writing code - it's about building experiences that actually help people.

Skills

Languages: Python, JavaScript, HTML, CSS
Frameworks & Libraries: Streamlit, Flask, Pandas, NumPy, TensorFlow, React.js
Tools & Platforms: Git, Figma, WordPress, API Integration
Concepts: AI/ML Basics, Data Preprocessing, Time Series Forecasting, NLP

Experience

AI: Transformative Learning Intern 01/2025 – 03/2025
TechSaksham India

- Built a local, offline image generation pipeline using Stable Diffusion, integrated with ComfyUI. Configured and enhanced the workflow for efficient image rendering with customizable prompts. Focused on user-friendly interface design, and optimized performance for high-quality output.
- I gained valuable experience working within TechSaksham, applying learned concepts directly to relevant work situations.
- Participated in workshops and presentations related to projects to gain knowledge.
- Prepared project presentations and reports to assist senior staff.
- Contributed to project success by diligently performing literature reviews.

Projects

Personalized Health Tracking Website 04/2025
HTML | CSS | JavaScript

- Developed a responsive health tracking site for fitness monitoring and diet planning.
- Built engaging front-end design and interactive features to support goal tracking and user metrics.

Crypto Trend Analyzer & Price Predictor 05/2025
Python | Streamlit | LSTM | TextBlob | NewsAPI | CoinGecko

- Developed a real-time crypto prediction dashboard using LSTM-based modelling and integrated sentiment analysis from live news articles.
- Used CoinGecko API for historical price data and NewsAPI + TextBlob to score market sentiment.
- Deployed a fully interactive web app using Streamlit with visualized predictions.

Certifications

- Generative AI - Simplilearn
- Machine Learning Using Python - Simplilearn
- Big Data Analytics - Great Learning
- AI/ML Basics - Analytics Vidhya
- Blockchain Basics - Great Learning
- Internship in "AI: Transformative Learning" - TechSaksham

Education

B.Tech in Computer Science & Engineering

ITM (SLS) Baroda University

09/2021 – Present

Vadodara, Gujarat

H.S.C : Science (Group A - Physics, Chemistry, Mathematics)

Shree Navdurga High School

Rajpipla, Gujarat

Languages

GUJARATI

HINDI

ENGLISH

Additional

- Building a portfolio site to showcase live project demos
- Currently learning basic concepts of Data Science
- Open to internship opportunities in AI, Web Dev, and FinTech domains
